Business Question and Visualization Report

Date	27 October 2026
Team ID	EN25CS3011046
Project Name	Formula 1 Race Intelligence Dashboard
Maximum Marks	5 Marks

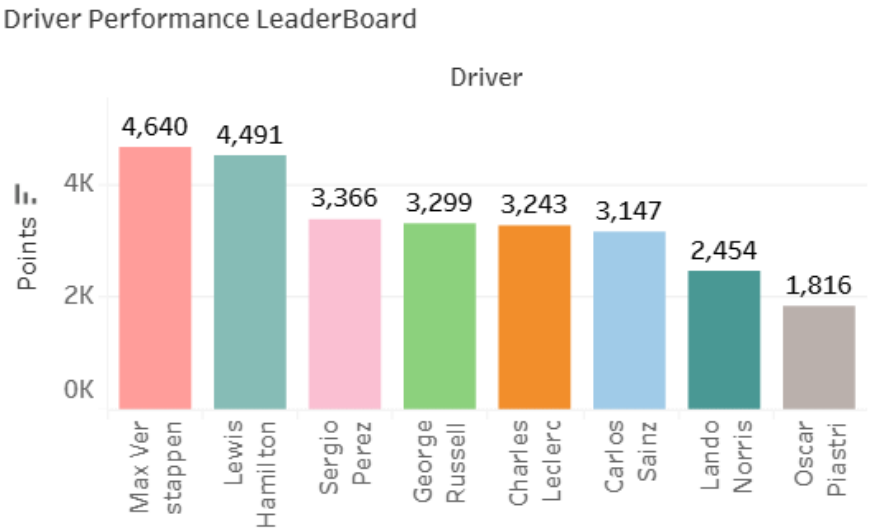

Visualization development refers to the process of creating graphical representations of data to facilitate understanding, analysis, and decision-making. The goal is to transform complex datasets into visual formats that are easy to interpret, enabling users to gain insights and make informed decisions. Visualization development involves selecting appropriate visual elements, designing layouts, and using interactive features to enhance the user experience. This process is commonly associated with data visualization tools and platforms, and it plays a crucial role in business intelligence, analytics, and reporting

Business Questions and Visualisation

The process involves defining specific business questions to guide the creation of meaningful and actionable visualizations in Tableau. Well-framed questions help in identifying key metrics, selecting relevant data, and building visualisation that provide insights.

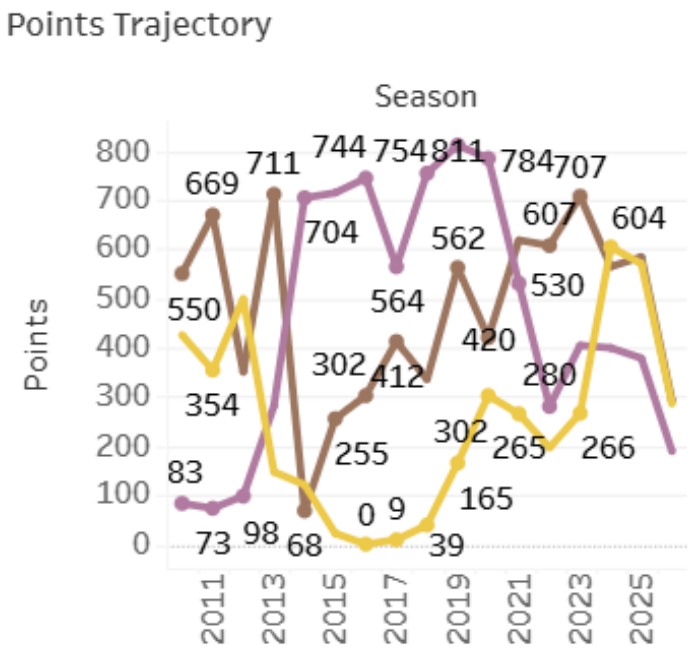

1. Which drivers have scored the most career points?

- *Visualization:* Bar chart (Driver Performance LeaderBoard) ranking drivers by total points.
- *Insight:* Max Verstappen leads with 4,640 points, followed by Lewis Hamilton (4,491), Sergio Perez (3,366) and George Russell (3,299). Oscar Piastri has 1,816 points among the drivers shown.
- *Screenshot of visualisation*

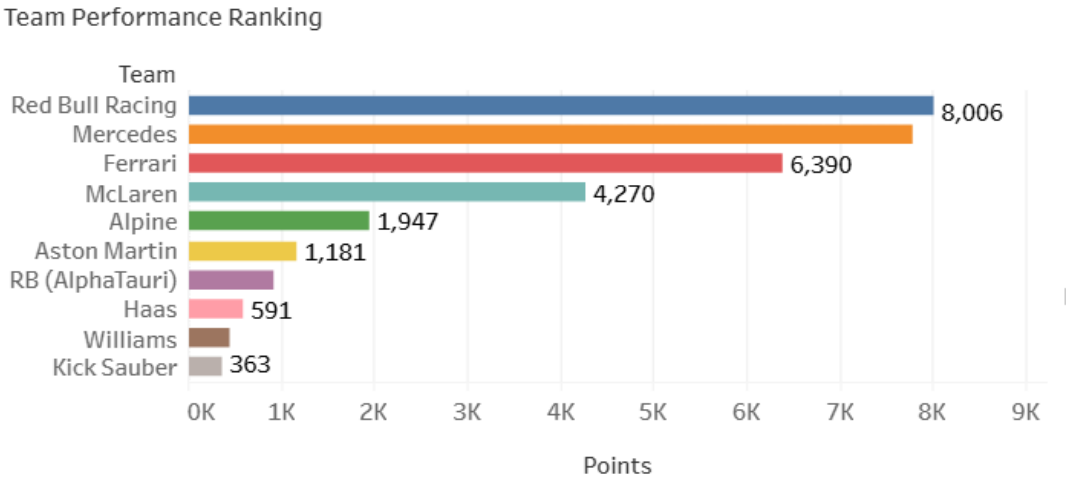

2. How have points changed from season to season?

- *Visualization:* Line chart (Points Trajectory) showing points by season from 2011 to 2025.
- *Insight:* Points move up and down from season to season, with the highest season totals reaching more than 800 points. This shows that the title fight shifts between teams over time.
- *Screenshot of visualisation*

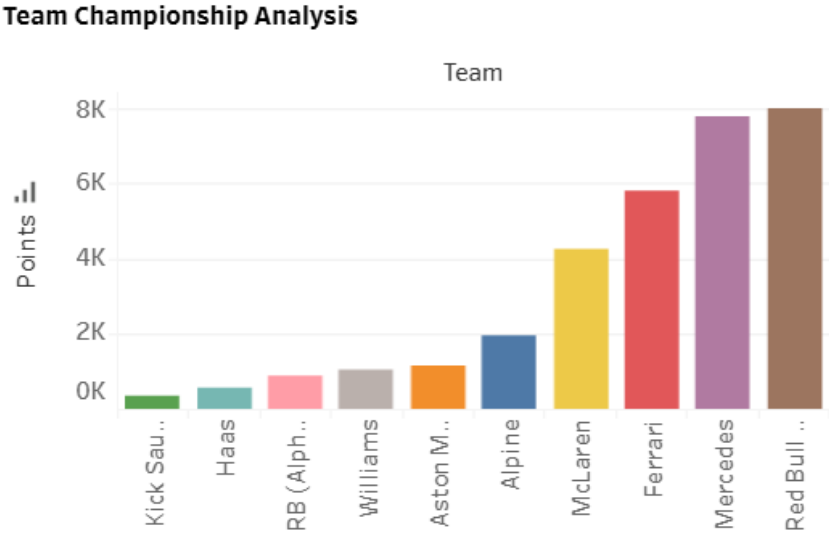

3. Which teams have scored the most points overall?

- *Visualization:* Horizontal bar chart (Team Performance Ranking) of total points by team.
- *Insight:* Red Bull Racing leads with 8,006 points, with Mercedes close behind, then Ferrari (6,390) and McLaren (4,270). Kick Sauber has the lowest total shown (363).
- *Screenshot of visualisation*

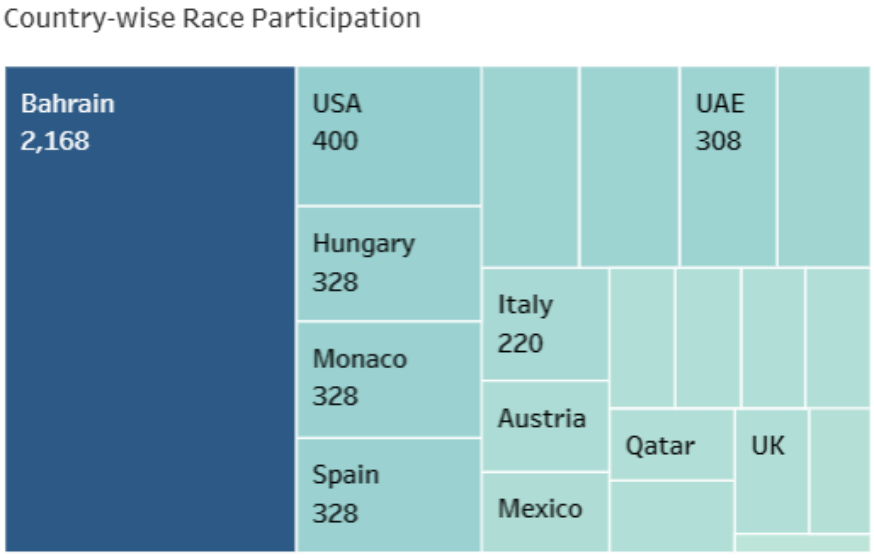

4. How big is the gap between the top and bottom teams in the championship?

- *Visualization:* Column chart (Team Championship Analysis) of points by team, sorted from lowest to highest.
- *Insight:* Red Bull Racing and Mercedes sit far above the rest at around 8K points, while Kick Sauber, Haas and RB (AlphaTauri) are below 1K. A few teams hold most of the championship points.
- *Screenshot of visualisation*

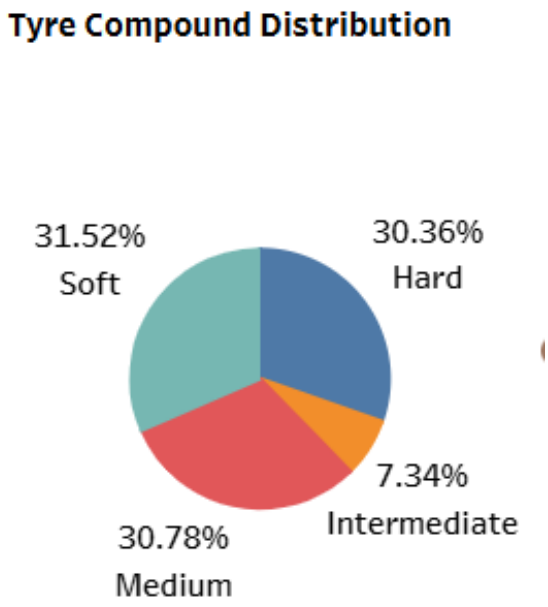

5. Which countries have the highest race participation?

- *Visualization:* Treemap (Country-wise Race Participation) where the size of each box shows participation.
- *Insight:* Bahrain stands out with 2,168, followed by the USA (400), Hungary, Monaco and Spain (328 each), the UAE (308) and Italy (220).
- *Screenshot of visualisation*

6. Which tyre compounds are used the most?

- *Visualization:* Pie chart (Tyre Compound Distribution) showing the share of each compound.
- *Insight:* Soft (31.52%), Medium (30.78%) and Hard (30.36%) are used almost equally, while Intermediate is used the least (7.34%).
- *Screenshot of visualisation*

7. Which drivers and teams collect the most podium finishes?

- *Visualization:* Packed bubble chart (Podium Achievements by Driver and Team), where larger bubbles mean more podiums and colours show teams.
- *Insight:* A handful of large bubbles dominate the chart, showing that podium finishes are concentrated among a small group of driver and team combinations.
- *Screenshot of visualisation*

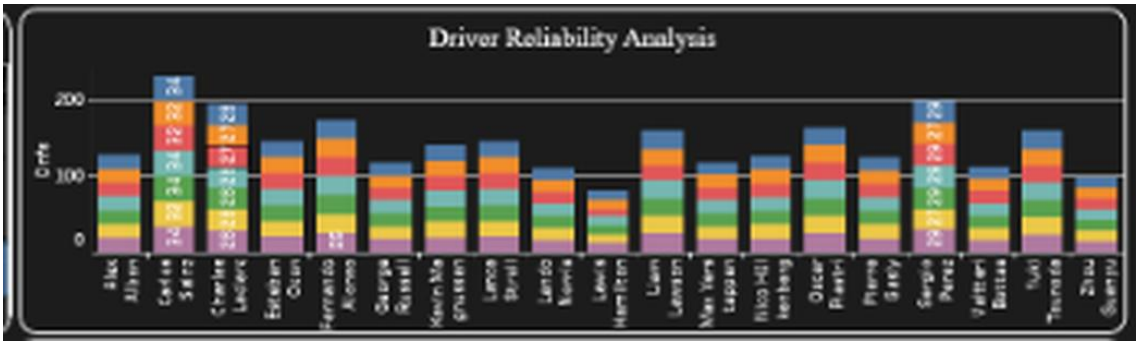

8. Which drivers fail to finish most often, and why?

- *Visualization:* Stacked column chart (Driver Reliability Analysis) where each colour is a DNF reason such as brake failure, collision, engine, gearbox, hydraulics or mechanical.
- *Insight:* Carlos Sainz, Sergio Perez and Charles Leclerc have the tallest stacks, at roughly 200 or more records each, while Lewis Hamilton has

one of the shortest. The coloured segments show which failure types affect each driver most.

- *Screenshot of visualisation*

9. Which nations are represented across the Grand Prix calendar?

- *Visualization:* Filled map (Global Driver Distribution Across Grand Prix Nations) with a count label for each country.
- *Insight:* Canada (308) and Singapore (268) have the highest counts on the map, followed by Mexico (160) and Japan, the Netherlands and Saudi Arabia (140 each). This shows how widely the sport is spread across the world.
