Project Development Phase
Performance Test

Date	28 October 2026
Team ID	EN25CS3011046
Project Name	F1 Race Intelligence (Vijeta Nagda)
Maximum Marks	

Project Performance Testing:

Project team shall fill the following information in model performance testing template.

S.No.	Parameter	Screenshot / Values
1.	Data Rendered	Data source: F1_Racing_Project_Dataset.xlsx connected in Tableau Desktop (Excel connector); sheets related on common keys. Sheets loaded: race_results, championship_standings, circuits and related sheets. Records: 6,464 race records covering 17 seasons.
2.	Data Preprocessing	Checked for null values and duplicate records; removed or corrected them. Standardised DNF reason / status labels and driver, team and country names. Extracted the year from the race date (Year of Race Date) for season-wise analysis. Set correct data types (date, number, string) and hid unused fields.
3.	Utilization of Filters	**Filters used on the dashboard and visuals:** 1. DNF Reason – filters the reliability view by retirement reason. 2. Year of Race Date – focuses all connected visuals on a season or range. 3. Top N parameter – shows only the top N drivers / teams. Filters are applied across the relevant worksheets so the dashboard updates together.
4.	Calculation fields Used	**Calculated fields used (KPIs and flags):** Win flag, Podium flag and DNF flag for each result. Total Points, Total Wins, Total Podiums and Total Races (KPI row). DNF Rate and Average Points per Race. Top N rank calculation controlled by the Top N parameter. Year of Race Date (date part of the race date).
5.	Dashboard design	No of Visualizations / Graphs - **Number of visualizations / graphs: 9 (on one dashboard)** 1. Map – geographic driver distribution 2. Driver reliability (DNF) 3. Driver leaderboard 4. Team ranking 5. Team championship (season-by-season) 6. Tyre compound pie

		7. Country participation treemap 8. Podium bubbles 9. Points trajectory Layout: fixed size 1400 × 1000, white theme, title banner and KPI row. **Live dashboard (Tableau Public):** https://public.tableau.com/app/profile/vijeta.nagda/viz/F1_Race_Intelligence/F1RaceIntelligenceDashboard
6	Story Design	No of Visualizations / Graphs - **Number of scenes: 9 (one visual / dashboard view per scene)** 1. KPIs overview 2. Geographic driver distribution 3. Driver reliability / DNF 4. Driver leaderboard 5. Team ranking 6. Season-by-season championship 7. Tyre strategy 8. Country-level race participation 9. Podium achievements **Live dashboard (Tableau Public):** https://public.tableau.com/app/profile/vijeta.nagda/viz/F1_Race_Intelligence/F1RaceIntelligenceDashboard
