Story

Date	27 October 2026
Team ID	EN25CS3011046
Project Name	Formula 1 Race Intelligence Dashboard
Maximum Marks	5 Marks

By using stories in Tableau, you can effectively communicate complex data in a way that is both interactive and engaging, making it easier for the audience to follow along and understand the insights. It's a tool for **data storytelling**, allowing you to present insights in a cohesive, engaging way that takes viewers through a logical progression of findings or analyses.

In Tableau, **Story** is a feature that allows you to create a sequence of dashboards, visualizations, and text to present data insights in a cohesive and narrative-driven way. It's like a slideshow within Tableau that guides the audience through a series of data points, helping them understand key insights, trends, or outcomes of your analysis.

Story: Formula 1 Race Intelligence – From Global Overview to Championship Success. Story points: (1) Global Driver Distribution Across Grand Prix Nations, (2) Country-wise Race Participation, (3) Team Championship Performance Analysis, (4) Driver Reliability Analysis, (5) Podium Achievements by Driver and Team, (6) Tyre Compound Usage Distribution, (7) Team Performance.

Observations:

- **Global reach**: The story opens with a map of drivers by Grand Prix nation, led by Canada (308) and Singapore (268), showing how widely the sport is spread.
- **Bahrain dominates participation**: The country-wise view shows Bahrain at 2,168, far ahead of the USA (400) and Hungary, Monaco and Spain (328 each).
- **A few teams lead the championship**: Red Bull Racing (8,006 points) and Mercedes are far ahead of Ferrari (6,390) and McLaren (4,270), while Kick Sauber has just 363.
- **Reliability differs by driver**: The reliability story point splits each driver's DNF records by reason, such as engine, brake failure, collision and gearbox.

- **Podiums and tyres**: Podium finishes are concentrated among a few driver and team combinations, and soft, medium and hard tyres are used almost equally (about 30% each).
