Project Design Phase-I
Problem – Solution Fit Template

Date	27 October 2026
Team ID	EN25CS3011046
Project Name	Formula 1 Race Intelligence Dashboard
Maximum Marks	2 Marks

Problem – Solution Fit Template:

The Problem-Solution Fit simply means that you have found a problem with your customer and that the solution you have realized for it actually solves the customer's problem. It helps entrepreneurs, marketers and corporate innovators identify behavioral patterns and recognize what would work and why

Purpose:

- ❑ Solve complex problems in a way that fits the state of your customers.
- ❑ Succeed faster and increase your solution adoption by tapping into existing mediums and channels of behavior.
- ❑ Sharpen your communication and marketing strategy with the right triggers and messaging.
- ❑ Increase touch-points with your company by finding the right problem-behavior fit and building trust by solving frequent annoyances, or urgent or costly problems.
- ❑ **Understand the existing situation in order to improve it for your target group.**

Template:

1. CUSTOMER SEGMENT(S) [CS]	6. CUSTOMER CONSTRAINTS [CC]	5. AVAILABLE SOLUTIONS [AS]
• F1 race analysts and team strategists who study driver and team performance. • F1 fans and motorsport journalists who follow championships and write or talk about them.	• Data is spread over many tables and spreadsheets. • Limited time and no coding or BI skills. • Needs free tools, not paid software. • Static reports cannot be filtered.	• Spreadsheets and results tables: familiar, but slow and not interactive. • Stats websites: reliable, but limited custom comparison. • Social media posts and infographics: attractive, but static.
2. JOBS-TO-BE-DONE / PROBLEMS [J&P]	**9. PROBLEM ROOT CAUSE [RC]**	**7. BEHAVIOUR [BE]**
• Compare drivers and teams across seasons. • Understand why races and championships were won or lost. • Check reliability (DNFs) and tyre strategy. • Find insights quickly to explain or report them.	• Race results are large (6,464 outcomes across 17 seasons) and not linked to drivers, teams and circuits in one place. • No single interactive view combines performance, reliability, tyres and podiums.	• Scrolls through tables and compares numbers by hand. • Searches several websites for each question. • Copies or screenshots stats to share with others.
3. TRIGGERS [TR]	**10. YOUR SOLUTION [SL]**	**8. CHANNELS OF BEHAVIOUR [CH]**
• A race weekend or a close championship battle. • A need to back up an opinion or article with numbers. • Seeing a shareable interactive dashboard.	• An interactive F1 Race Intelligence Dashboard and story built in Tableau, with a driver leaderboard, points trajectory, team ranking, DNF reasons, tyre mix, podiums and country participation. • Published on Tableau Public and embedded in a Flask website with season, driver and team filters.	• 8.1 Online: searches for F1 stats, opens the shared dashboard link in a browser, shares the link by WhatsApp or social media. • 8.2 Offline: discusses stats in meetings or with friends and uses screenshots in reports and presentations.
4. EMOTIONS: BEFORE / AFTER [EM]		
• Before: overwhelmed, frustrated and unsure of conclusions. • After: confident, in control and curious to explore more.
